

Bryan Saldivar, PhD.

Generative AI for
drug discovery.
Latent diffusion
and AE

Time series
forecasting for
breast cancer
diagnosis

SARS-CoV-2
Mutation
prediction

Business
growth
prediction

Heartbeat
detection with
computer vision

Anemia
diagnosis with
computer
vision. 1, 2, 3.

Job Experience

Post Doc

IRB Barcelona

(2024/06 - Present)

I am building Generative AI for drug discovery with pytorch and latent diffusion (See more)

Lead Teacher

Ironhack

(2025/09 - Present)

Teaching applied generative AI and automation for professionals: ChatGPT, Gemini, PowerBI, Make.com

AI/ML Consultant

Freelancer

(2025/01 - Present)

Providing AI/ML services for individuals and companies.

Research Assistant

UPCH University, Peru

(2018/01 - 2019/02)

Machine learning/AI research on computer vision for anemia and tuberculosis diagnosis.

Innovation consultant

Freelancer, Peru

(2016/04 - 2018/01)

Patent analysis, project formulation for government grants.

IT Engineer

Electrodata, Peru

(2012/01 - 2014/02)

I designed solutions and provided customer support for server, desktop and application virtualization. (Hypervisors, citrix). In addition load balancers (Netscaler), DNS and DHCP servers (Bluecat). Installation of digital certificates.

Network Administrator

Sistemas UNI, Peru

(2010/06 - 2011/04)

Administrator of SQL database, website, network and firewall

Awards

Patent of Innovation

Patent of a machine that produces nut milk as a home appliance

Data science competition, 3rd place

BBVA bank Data Challenge, 2022

Prediction of what company will grow next year using bank data. I ended 3rd out of 730.

Scholarship awardee, PhD and masters

I received a Marie Curie Scholarship for my PhD studies and a government scholarship for my masters' studies.

Publications

- Prediction of recurrent mutations in SARS-CoV-2 using artificial neural networks
- Portable system for the prediction of anemia based on the ocular conjunctiva using Artificial Intelligence

Conferences & events

- "Generating Novel Chemical Entities using Latent Diffusion and Hierarchical Variational Autoencoders for Target Specific Binding," at the "AI in Drug Discovery and Biomedicine". Poster presentation. 2025/04.
- Researchers' night, Tarragona 2019. I made a web app that uses face recognition to show what scientist looks more similar to you.
- Portable Anemia detection system. Innovation week, Peru 2018. Conference presentation.

Education

- PhD Nutrigenomics, 2019/02-2024/05. AI/ML for SARS-CoV-2 mutation prediction.
- Masters degree in Science Technology and Innovation Management and Policies.
- Bachelor's degree in Telecommunication Engineering.
